

How To Make Scoops: For Tossing And Catching Games

Compliments of KID-FIT P.E. Classes for Preschoolers - <http://www.kid-fit.com>

Can't Lose Scoop

Take an empty gallon milk container, wash, dry and remove the label. Cut as shown to make a large, wide mouth scoop. This is great for younger children and can be used to catch hacky sacks, nerf balls, sponge balls and bean bags. It's large size guarantees success.

Challenge Scoops (blunt cut)

Clean and remove the label from a 2 liter soda bottle. Cut straight around the bottle at the halfway point. Cover the edge with tape or contact paper. Great to decorate with colored sticky paper.

Ground Scoops (angled)

Clean and remove the label from a 2 liter soda bottle. Cut with scissors as shown to make an angled scoop. Good for games that require scooping objects up off the ground.
